

Dear Hogarth Family Foundation,

I am writing to thank you for your generous sponsorship of my Indspire Bursary. I was very happy to learn that I received this bursary and I want to express my sincere gratitude to you.

To provide some background about myself, I have just completed my second year of the Computer Science Honours program at the University of Manitoba. I am very dedicated to my studies and have been quite successful so far, having been on the Dean's Honour List every term and being a President's Scholar. I am currently working at Manitoba Hydro, developing software to facilitate power systems studies. I am also currently in the process of applying to the Computer Science Co-op Program which involves three four month work terms in the industry before I graduate. The program starts next year and I am very excited for the opportunity to continue applying my learning and to gain valuable experience.

After I complete my degree, my career goal is to become a software engineer. I have always been passionate about technology and I want to create innovative applications and contribute to advancements in software. I would love to make it to a tech city and secure a position with a big tech company. I also plan to work on personal projects and to publish my own apps. Depending on job prospects after graduation, I am considering pursuing a master's degree as well.

Your support helps me greatly in pursuit of my goals. It allows me to worry less about finances and to spend more time on my studies and work less during the school year. It also allows me to continue volunteering as a hockey coach without having to worry about not being paid. I hope to one day be able to help other students as you have helped me.

Thank you so much for your generous support,

Caden Chabot
