Dear Sponsor of the Imperial Indigenous Scholarship Program & ASTT,

I would like to thank you for your support towards my continuing studies. My name is David "Justin" Procyk. I am an 18-year-old Métis student born and raised in Calgary. I am currently in my first year at the University of Calgary in the Indigenous Student Access Program (ISAP) improving my GPA for a better chance to be accepted into their Engineering Program and more specifically into Mechanical Engineering.

I am a very hands-on person with a strong curiosity on how things work. I find math and science interesting which is why I want to go into the Mechanical Engineering field of study. I am excited for the future prospects of this field and the potential to be a part of advancement and development on current and new technologies.

I would like to give back to my community by becoming a mentor to other youths and adults. I was fortunate to experience mentorship and volunteering for the Boys and Girls Club of Calgary with the Escape STEM (Science Technology Engineering Mathematics) program which was designed by an Engineering student from the U of C for Indigenous youth. I truly enjoyed the experience knowing that I may have had an impact on someone's future.

Receiving this scholarship is going to help me focus more on my studies and relieve my anxiety about tuition fees for my next semester. It is contributions and support like this that makes advanced education possible.

Thank you very much for your kind and generous support towards my future.

Sincerely,
Justin Procyk
