

Thank you

Dear sponsor of Aboriginal Health Human Resources Initiative (Medical and Dental Awards).

I would like to thank you for your time and support in considering me for this donation. My name is Korrin Chisel. I am studying in my 1st year of Bachelor of Science in Nursing at the Cambrian College campus. This has made a difference in my situation as I will not have to worry about how I will need to manage my money for the month to meet bills, pay for groceries or worry about vehicle maintenance throughout the year. When I have completed this program, I will work in a hospital to learn and experience as much as possible. I will then look for opportunities (organizations such as slfnha located in Sioux Lookout) to work in First Nation reserves, especially isolated reserves either in crisis or need more nurses to help and work through crises, minimizing stress on the community members and leaders. I will also encourage Indigenous youth to continue their education and reassure them that life beyond the reserves exists and it is possible to reach for their dreams and aspirations. I will encourage Indigenous youth to be proud of who they are, where they come from, and that they have the strength and resilience to work for everything they wish in life.

I am immensely grateful for your support and generosity. This will help me successfully complete my education by knowing I am supported and minimizing my financial worries.
