

Dear Sponsor of the BMO Capital Markets Equity Through Education Award and matching funds from the Government of Canada,

My name is James Jones. I am originally from Forteau Bay, Labrador, but I am currently living in St. John's, Newfoundland, doing pre-requisite courses such as calculus, physics, and algebra to be eligible to apply for the Engineering program here at Memorial University. I have recently began my second year of university this fall.

With this award that you have graciously and generously awarded to me, it will go towards covering the costs of my tuition, textbooks, groceries, and rent costs to ensure that I am able to meet the financial requirements for fulfilling my desired education goals. With the help of this award, I plan to pursue Mechanical Engineering to hopefully get a job with IOC (Iron Ore Company of Canada) in Labrador City to try to develop and implement new and efficient ideas for processing the resources there. Overall, my main goal is to give back to the land where I was raised, and that has made me into the person that I am today. I intend to work very hard to achieve my goals and this award will certainly aid me in doing so, and I am very grateful for being presented with this generous award. Thank you.

-James
