Dear Sponsor of the Ted Rogers Scholarship,

It is with humble appreciation I write to thank you for the generous scholarship that you have awarded me. As I currently work towards the completion of my educational goals, it is with your generous help that my career aspirations are becoming so much more achievable. I am studying Chemical Process Engineering Technology at the College of the North Atlantic. Coming from a small, isolated community in Labrador, I do not have the opportunity to receive my post-secondary education while living at home with my parents. Aside from the fact that I am living away from family, trying to stay healthy and focus on working hard in school, there is the consideration of the immense expense it is to attend school. Your generous contribution towards my education allows me to be able to make this transition much more accessible.

Understanding how things work has always intrigued me. My dream to become an engineering technician will hopefully allow me to provide services to various places in Canada and perhaps even beyond, but I'm really interested in working in rural, remote areas on special projects. My goal is to hopefully take on leadership roles in my workplace and in society as a volunteer. I am looking forward to unique opportunities to work alongside investigators of prestigious projects and make personal contributions. Your award has reinforced for me the importance of contributing to my community and to work hard. Thank you so much for your generous support towards helping me achieve my educational dreams.

Sincerely yours,

Blake Rumbolt
