

David Jr Watsko
Nunavut Arctic College
Environmental Technology Program 2nd year

Dear Inspire Building Brighter Futures: Government of Canada Endowment fund

My name is David Jr Watsko, I am from Grise Fiord, Nunavut. The smallest and most northern community in Canada. I applied to the Environmental Technology Program at Nunavut Arctic College to further my education in the environment field. I grew up going out on the land and this program teaches a lot about the scientific aspect of our land. "Nunavut" meaning our land in Inuktitut, inspires me to make the best of every experience in and out of this program.

I am currently in my second year of this two-year program, and it prepares each student to be diligent and value our environment.

This bursary/scholarship will help with rent, utilities, food, transportation, internet, and many more daily purchases while in college. I feel more secure about finishing my education and it takes less stress to worry about my limited budget for the month as I can comfortably extend my budget and support myself being a student.

I want to be the change I want to see in my Territory, to the youth and advocate furthering education as much as possible. I want to continue my education and have applied to Inuit Studies at Nunavut Sivuniksavut.

Thank you for the generous support!

David Jr Watsko
