

Building Brighter Futures Graduate Outcomes

This study seeks to examine graduation rate trends, barriers to graduation and successful graduation outcomes, looking at 2014-2015 & 2015-2016 academic years.

LEVELS OF STUDY ATTAINED

- **46.3%** – Undergraduate degrees
- **21.9%** – Diplomas
- **18.4%** – Certificates
- **8.2%** – Master's degrees
- **1.4%** – Graduate degrees
- **1.1%** – High school diplomas

OF EMPLOYED GRADUATES...

- **74%** secured full-time work and **26%** part-time work.
- **61%** of employed graduates indicated they were **servicing Indigenous populations.**

"I became a student as a single mother of 2, since my children were 3 years and 3 months old. They are now 6 and 9 and with the generous support from Indspire, I have been able to lessen the financial burden associated with being a mother and a student. I have been able to move further in my academic studies than I ever dreamed possible. I hope to begin a PhD in the Fall of 2017- something that might not be possible if it weren't for Indspire! Thank you!"

– BBF Recipient

→ What's the takeaway?

BBF recipients are graduating at high rates, with many continuing on to further post-secondary education and many employed graduates servicing Indigenous populations. Together, these outcomes point to the value of sustained support for Indigenous students.
